

## Universal Stopper

## STI-13010FR, STI-13020FR, STI-13010EG & STI-13020EG

The Universal Stopper is a low-profile domed polycarbonate cover for indoor and outdoor use, designed to protect manual call points, emergency buttons, and other devices without restricting legitimate operation. Suitable for push buttons, electrical devices, and call points, providing robust protection against accidental and intentional damage, dust, grime, and harsh environments.

### How it works

The Universal Stopper consists of a clear, tamperproof, tough polycarbonate cover and frame that retrofits over the break glass call point. When lifted to gain access to the break glass, its optional battery powered integral sounder emits an ear piercing 96 dB (at 1 metre). Immediate attention is drawn to the area.

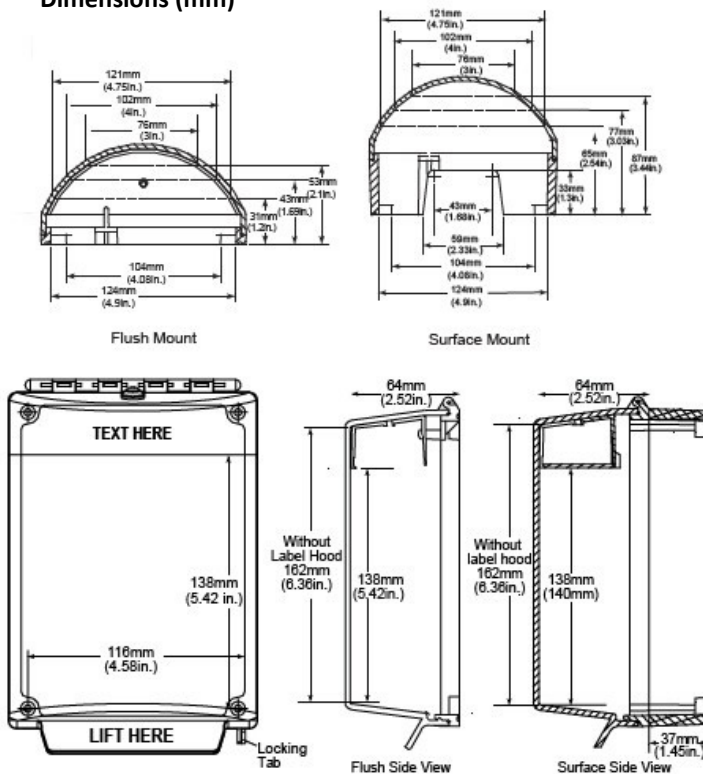

Part Code	Description
STI-13010FR Red	Flush Mount – Label text IN CASE OF FIRE
STI-13020FR Red	Flush Mount with sounder – Label text IN CASE OF FIRE
STI-13010EG Green	Flush mount - Label text IN CASE OF EMERGENCY
STI-13020EG Green	Flush mount with sounder - Label text IN CASE OF EMERGENCY
